

In January the LaSalle's Board of Directors discussed and approved providing a designated area on the property where owners can leave kayaks near the water but on the common property (at their own risk). Next week markers will be placed next to the observation deck on the service road to denote the location. If owners choose to leave a kayak over the summer months we will ask that you place the unit number on the kayak so that we can ensure that it is from our community and that we may contact an owner should we need to. We will not remove kayaks from the designated area without speaking with an owner.

As a note of caution, kayak's stored on the DNR side of the property line can and will be confiscated by the DNR (they will place orange tags on the boats and then come back a few weeks later).
